

## Company Profile

Zumasys is a full service technology solution provider. We specialize in implementing multi-vendor infrastructure solutions that solve IT challenges for small to medium-sized businesses across North America.

Zumasys provides leading-edge solutions for disaster recovery, server and desktop virtualization, centralized storage, IP-telephony, warehouse management, collaboration and much more. Our solutions allow our clients to preserve and evolve legacy applications while at the same time advancing their infrastructure, either on premise or in the cloud. Zumasys is known for applying its expertise in server virtualization, centralized storage and remote access methodologies to save money while addressing the unique challenges of our customers. Partnering with the industry's leading technology companies including NetApp, VMware, Citrix, HP, IBM and SonicWALL, Zumasys delivers the right solutions, the first time.

In 2006, Zumasys launched an Application Hosting offering that allows companies to move their applications to a hardened data center and run their businesses on a 100% virtual server platform. This highly flexible cloud computing model incorporates rental licensing and is perpetually upgraded. By outsourcing management of their IT infrastructure, Zumasys' customers benefit from the latest software and hardware technologies and world-class telephone support, and ultimately become free to focus on their core business.

## History

Named after the Aztec emperor Montezuma who was forced to confront the "new world," Zumasys helps companies preserve their historical IT investments as they move to embrace new technologies. Today, nearly 2,500 companies across North America including Rio Tinto, American Express & The Irvine Company rely on Zumasys for world class technical services and support. Zumasys is based in Orange County, California, home to some of nation's largest technology companies and a hot bed of IT innovation.
