

Senior Systems Engineer - Enterprise Services

Senior System Engineers on the Enterprise Services Team are responsible for implementing complex technical solutions at client sites and datacenters. This dynamic role is involved in both the pre-sales design of solutions as well as the delivery of services sold. Solutions range from Cloud Computing solution design, virtualization (VMware), disaster recovery and HA solutions (NetApp), unified communication solutions (Exchange), and application delivery solutions (Citrix). Our engineers travel to clients on a national basis and work very closely with decision makers at every level to ensure solutions meet client expectations and are implemented according to best practices. In addition to expert level knowledge in solutions provided, the Senior Systems Engineer must have excellent customer service skills in order to interact with Clients, Project Managers, and Solutions Consultants at every stage in the delivery process. In this role, the Senior System Engineer is naturally on the cutting edge of technology and as such is an excellent opportunity for the truly passionate IT professional.

Zumasys is seeking individuals to join our team and be a part of our exciting growth and expansion across North America. Contact careers@zumasys.com to apply.

Zumasys helps companies of every size elevate their business by transitioning their IT infrastructure and applications to the cloud. Our personalized approach to cloud computing means we take the time to listen to our customers, understand their business objectives, and develop a customized solution that accommodates any application. Our state-of-the-art hosting platform uses the latest technologies to deliver world-class reliability, integrated disaster recovery, and the peace of mind that only an expert cloud solution can offer.
