

Systems Engineer - Technical Support Services

Systems Engineers on the Technical Support Team are challenged on a daily basis to remotely troubleshoot and resolve a wide variety of technical issues for our growing client base. Most issues are centered at the server infrastructure level and require the ability to apply experience and fundamental technical expertise to unique circumstances. This fast-paced position is at the center of our client experience. As such, this position requires excellent communication and customer service skills in addition to technical acumen. Engineers in this role have the opportunity to gain first-hand experience and knowledge on new technologies being rolled out to client every day. It is great for those passionate about technology and eager to learn new skills.

Zumasys is seeking individuals to join our team and be a part of our exciting growth and expansion across North America. Contact careers@zumasys.com to apply.

Zumasys helps companies of every size elevate their business by transitioning their IT infrastructure and applications to the cloud. Our personalized approach to cloud computing means we take the time to listen to our customers, understand their business objectives, and develop a customized solution that accommodates any application. Our state-of-the-art hosting platform uses the latest technologies to deliver world-class reliability, integrated disaster recovery, and the peace of mind that only an expert cloud solution can offer.
