

Manage Your Inventory with Key Central Software

WHY KEY CENTRAL WAREHOUSE?

With Key Central Warehouse, you don't have to compromise when it comes to the processes and procedures that give your business a competitive edge. Key Central Warehouse is the only fully customizable warehouse management software that integrates directly with your Famous software systems, linking islands of data from applications, databases, spreadsheets and forms throughout your warehouse.

KEY BENEFITS

Key Central Warehouse management software was designed to meet the unique needs of produce growers, packers, and shippers.

With Key Central Warehouse you can:

- Link your warehouse data directly with your Famous systems to eliminate points of error, speed order fulfillment and improve accuracy
- Access your warehouse data anytime, on any device with the Key Central Warehouse integrated web portal
- Maximize produce traceability—from the field to the fork
- Enhance quality control with advanced temperature logging and inventory systems that are tied directly to Famous
- Gain complete control over every aspect of your operations with real-time access to warehouse data and produce status

THE VALUE OF CUSTOM SOFTWARE

Unlike one-size-fits-all boxed software solutions, Key Central Warehouse allows you to customize your warehouse management software to support the unique way you receive, store, package, and ship your produce. Choose from a variety of systems, including Visual Warehouse, Quality Control Optimization and Sorting Line Integration, to get the features that you need—when you need them.

KEY CENTRAL WAREHOUSE

- Automate and streamline cooler operations
- Speed order fulfillment and improve accuracy
- Maximize traceability
- Centralize management by syncing data with Famous
- Access warehouse data anytime on any device

KEY CENTRAL AT A GLANCE

- In 1979, Bob Brown, managing member of Brown & Brown Farms LLC, created a DOS-based ERP for produce growers, packers, and shippers
- In 2002, Brown developed Key Central® to bring the same capabilities to Famous users
- Since then, Key Central has been used to develop hundreds of modules for dozens of customers

KEY CENTRAL SYSTEMS

- Warehouse Management
- Visual Warehouse Management
- Quality Control Optimization
- Sorting Line Integration

SYSTEMS OVERVIEW

VISUAL WAREHOUSE

Quickly view the status of every product in your warehouse from any device—desktop, laptop, tablet or phone.

- Access a graphical view of all of your rooms and locations
- Simplify cooler management and allow quick access for management and users
- Color-code pallet identifications by age classification
- View pallet identifications by commodity, variety, style, size, grade, label, region, method, color or storage
- Display data from multiple companies and multiple servers in a single view

SORTING LINE INTEGRATION

Connect your Famous systems to your sorting line systems for greater visibility and more detailed reporting.

- Streamline automation by eliminating manual processes in your sorting lines
- Access your sorting line data anytime, anywhere by leveraging a centralized repository linked directly to Famous

QUALITY CONTROL OPTIMIZATION

Link your QC data directly to Famous records to improve traceability and compliance. Digital entry and tracking eliminates manual processes and simplifies QC to reduce the risk of human error.

- Manage QC for each of your pallet types automatically, saving time in fulfilling orders so you can move product as quickly as possible
- Leverage automated alerts from Key Central Warehouse to be immediately notified in the event of a problem or missed step in the warehouse processes, helping you quickly resolve issues and get orders back on track
- Access your QC data through an intuitive web portal that makes analysis and sharing easy

USE CASES

- Payroll Data Collection
- Compliance Systems
- Sales Enterprise Planning
- Online Grower Reporting
- Grower / Supplier Data Integration
- Combined Financial Reporting
- Inbound Shipment Tracking
- Integration with Other Systems

A FEW OF OUR CUSTOMERS

ABOUT ZUMASYS

Zumasys is the leading provider of IT services to the produce industry. The Zumasys cloud platform is used by growers, packers and shippers across North America. Our personalized approach to cloud computing means we take the time to listen to our customers, understand their business objectives, and develop a customized solution that accommodates any application.

ABOUT KEY CENTRAL

Key Central provides custom software and data integration tools to help produce companies bridge the gaps between the technologies they depend on to maintain a competitive edge. With over a decade of experience developing custom solutions for Famous users, we can help you optimize your technology implementation.
