Veeam Cloud Connect

The easy, efficient way to get backups offsite to the Zumasys cloud

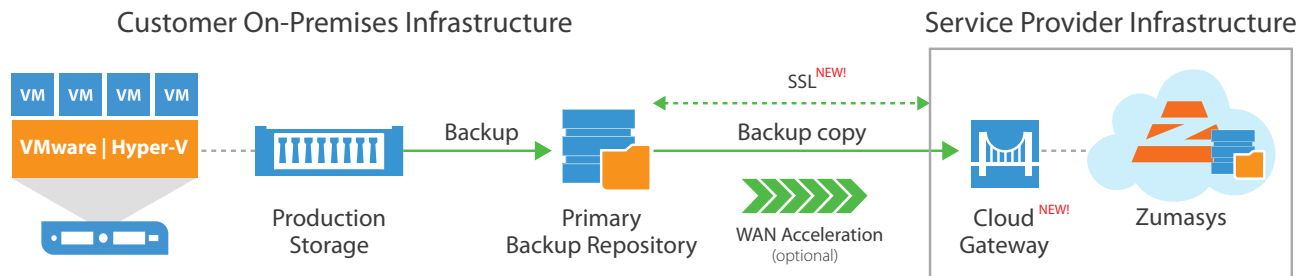

With more than 145,500 customers worldwide and 8.5 million VMs protected, Veeam® bridges the availability gap by providing *Availability for the Modern Data Center™*, which delivers RTOs and RPOs (RTPO™) of <15 minutes for ALL applications and data.

Veeam delivers powerful and reliable features and functionality to help you avoid the risk of catastrophic data loss. Veeam Cloud Connect is included within Veeam Availability Suite™ v8, Veeam Backup & Replication™ v8, and Veeam Backup Essentials™ v8 at no additional charge and with no additional licensing required.

With Veeam Cloud Connect and Zumasys, you get:

- **Hosted offsite backups:** Get your backups offsite to hosted cloud repository through a secure SSL connection with no additional Veeam licensing required.
- **Complete visibility and control:** Access and recover data in hosted backup repositories directly from the backup console; track cloud repository consumption and receive reminders for hosted storage renewals.
- **A modern backup architecture:** Leverage Veeam's modern backup technology including Backup Copy Jobs with built-in WAN acceleration, forever incremental backups, GFS (grandfather-father-son) retention policies and more – all built into one product.
- **End-to-end encryption:** Rest easy by encrypting all data at source (before it leaves your network perimeter), in flight and at rest, without negatively impacting the data reduction ratios of built-in compression and WAN acceleration.

Zumasys is pleased to announce that you can now send your Veeam backups offsite to the Zumasys cloud hosted in the SUPERNAP Data Center in Las Vegas. Zumasys' hosted backup service is the easy and secure way to send data offsite over the Internet, using a single TCP port. Available at an affordable per-GB monthly fee, your data and VMs are stored on the Zumasys cloud and you can recover data directly from the Veeam backup console.
