

ACCESS, ANALYZE, DISCOVER, COLLABORATE

Gain Insight into Every Aspect of Your Organization

Rover BI transforms disjointed and disorganized data into unified information that is meaningful to executives, department managers and business users.

Comprehensive Data Access

Rover BI makes company-wide collaboration easier by providing a single access point to all your data, regardless of the source. Import multiple spreadsheets to create a custom data source and automatically import mappings and links with the click of a button.

Self-Service, On Demand Reporting

When it comes to analyzing data, a picture is worth a thousand rows. Rover BI's Data Visualizations are powerful and enable you to quickly create:

- Interactive trend and multi-series charts
- Traditional spreadsheet-style grids
- Graphs and maps with global colors
- All kinds of custom visuals showing what's happening within your organization via plug-ins

It's Easy to Setup Rover BI

- No need to configure a new server, Zumasys will set up and host your reporting server for you at no additional cost.
- No need to distract your employees with creating the API's to connect to Rover BI, Zumasys Professional Services department will write your API's for you and connect as few or as many data areas as you would like.
- With a little bit of training from Zumasys, your employees will be off and running, creating powerful visuals and dashboards in no time.
- Rover BI connects to all your application(s) with powerful and fast APIs and RESTful Services. We support all databases, including these MultiValue platforms and others – Universe, D3, OpenQM, and jBASE.
