- Reduce Fraud & Risk
- Card Vaulting and Storage
- Direct PIN Pad Integration
- Tokenized Card on File
- EMV Payment & Smart Card
- Simple, Intuitive Interface
- Secure Data Access
- Enable PCI-Compliance

zumasy.com

Easy to Implement

Rover Pay connects you directly to card reading devices and processing networks. With our simplified interface and a detailed integration guide, you need just a few modifications to your code.

Simplified Security

We've simplified the process of PCI compliance through secure tokenized vaulting and storage of Payment Card Information. This reduces the need for expensive, complex PCI auditing.

Universally Compatible

Supports XML, JSON, SQL and NoSQL systems along with MultiValue system, Universe, D3, jBASE, OpenQM running on any environments, Windows, Linux, Unix, and AIX.

Analytics Designed for Success

Uncover the hidden stories behind your sales data and customer spending patterns, growing sales, improve marketing efforts, and find new customers.
